I am a UX designer with 6+ years of experience designing user-centered B2B SaaS products. I enjoy working with product, engineering, and business teams to turn complex challenges into intuitive experiences.

Work Experience

Lighthouse UX Designer

SEP 2019 - JUNE 2026

- Researched user needs, behaviors, and pain points to uncover opportunities for product improvements and new features
- Contributed to new product features from concept to delivery, as well as improving and evolving existing features
- Owned product features end-to-end, from user research and discovery through delivery
- Collaborated closely with product managers, engineers and business teams to solve real user and business problems from discovery to delivery

Duotix UX/UI Design Intern

FEB 2019 - MAY 2019

- Contributed to designing digital experiences, from wireframes to UI design and prototyping

Education

Digital Design & Development (Devine) Howest

SEPT 2016 - JUNE 2019

- A Bachelor's degree focused on UX/UI design, front-end development, and digital innovation, with an emphasis on creating intuitive, user-centered digital products and experiences.
